The museum shows the architecture, customs, and crafts of Dobrich at the end of XIX and the beginning of XX AD. Its purpose is to preserve and develop the cultural and occupational traditions in the region.

The visitors will find out about the production processes of traditional arts and crafts - tailoring, knitting, wood turnery, goldsmith's trade, etc. There is a bakery, a millet-ale (or boza) shop, and an old style café. Visitors can try their hand at pottery, visit the café and taste the famous byalo sladko, boza, and Bulgarian wine.
